- San Diego, California

Education

San Diego State University

Bachelor of Science in Computer Science | December 2024

Cyber Security Professional | March 2025

Georgia Tech

Master of Science in Computer Science | Expected Starting Date: Fall 2026

Work Experience

North County Eye Center | San Marcos, CA

December 2025 – Present

IT Manager

- Monitor and oversee technician machines during issues that arise during normal work hours.
- Setup new computer for Optical testing use and remote access.
- Collaborate with technicians to resolve any issues that arise with their workstations.

HP | San Diego, CA

May 2025 – Present

Computing Representative

- Advise customers on HP desktops, laptops and printers based on their specific use cases and technical needs.
- Migrate ~300 users per month from Windows XP-10 to Windows 11.
- Show in depth product demonstrations, highlighting features, software compatibility and hardware specifications.
- Assist in troubleshooting common device issues and guiding customers on setup and maintenance.

Projects

HyperiaGames | Visual Studio, Git, Unity, Blender, Photoshop

September 2025 – Present

- Develop and maintain gameplay scripts and UI in both C# and C++, implementing core gameplay mechanics.
- Integrate AI systems into gameplay, improving character behavior and responsiveness.
- Collaborate with designers, artists and programmers to integrate assets, debug issues and optimize performance across builds by 20%.
- Create and design custom 2D and 3D player objects and level designs.

AI Image and Video Generator | Python, Diffusers, Transformers, Pytorch

March 2025 – June 2025

- Designed and developed an AI image and video generator that utilized web scraping for data collection for media generated content.
- Optimized data pipelines for high-quality and accurate media output from the information collected.

Autonomous Maze-Solving Robot | C++, Arduino, Depth First Search Algorithm

December 2024 – March 2025

- Designed a script to allow an Arduino based robot to complete a maze using Depth First Search Algorithm in C++.
- Utilized IR sensors for real-time wall detection and obstacle avoidance for the movement of the robot.
- Tested Robot to improve the efficiency by 23% with the used algorithm compared to others tested.

Technical Skills

- Programming Languages: C++, C#, Python, Java, R.
- Markdown Languages: HTML, CSS.
- Operating Systems: Windows (7, 8, 8.1, 10, 11), macOS, Red Hat Linux, Linux, Unix.
- Software Tools: Adobe Photoshop, Premier, Blender, Cinema 4D, Unity, Wireshark.
- IT Proficiencies: Computer diagnostics, repair, end user assistance, and assembly; data analysis and management.
